

NAME

REVISE pages 30-33 before you start.

1 The eyes are our sense organs of sight. Look at the diagram and complete the text.

Light passes through the at the front of the eye.
Then, it passes through the Next, it passes through
the The retina detects the light and sends
the information to the brain through the nerve.

2 The ears are our sense organs of hearing. Follow the route that sound takes through the ear and label the diagram.
