Listen to the audio.

Answer the questions:

How many times do people change their careers now?

How many careers has the speaker had?

What two things cause the job market to change quickly?

Why does the speaker like changing jobs?

Does the speaker know what career he will choose next?

Choose the correct word to fill in the gaps.

Choosing a career is one of the biggest we make in life. It used to be that we chose only one career. People would start a job when they were 18, 19 or 20 and stay in that same career . Their career path was quite straightforward. Nowadays, it is normal for people to change careers, five, six, seven times. New and globalization means things change quickly. We need to study and with all the changes. I've had four different careers now. I like moving from one job . It means life never gets boring. It's much better to keep learning different things in different careers. I have what career I'll choose next. Perhaps one that doesn't even exist today.

Listen again and see if you can write some of the sentences on a piece of paper.
