

NAME: _____ DATE: _____

RENEWABLE ENERGY SOURCES

Some of the answers to these questions are shown jumbled up in brackets at the end of the question.

- 1 Nuclear power stations use a metal called _____. (manuriu)
- 2 Uranium is dangerous because it can cause illnesses like _____. (ccaenr)
- 3 Type the three renewable energy resources from the list in the spaces provided.
COAL OIL BIOMASS WIND NATURAL GAS HYDROELECTRIC
4. Type the three energy sources that do NOT rely on the Sun in the spaces provided.

coal	nuclear power	hydroelectric power
tidal power	biomass	oil geothermal
- 5 Renewable energy resources will _____ run out. (eenvr)
- 6 Solar cells turn energy from the Sun directly into _____. (eelcitycrit)
- 7 A _____ can be powered by a solar cell. (torulacalc)
- 8 Solar panels can be used to provide _____ to homes. (oht wrate)
- 9 A biomass fuel is one made from _____ and _____ and their waste. (stnpla, slaanim)
- 10 Wood is an example of a _____ fuel. (miaboss)
- 11 Geothermal power uses the heat from underground _____. (rsock)
- 12 There are no hydroelectric power stations in Cayman because the islands do not have any high mountains with trapped _____. (terwa)
- 13 Renewable energy resource are also called _____ energy sources. (tivenaalret)
