Locomotion In Animals

Locomotion is an important process for animals. Animals have to move from one place to another for many reasons. They can't stay in one place in order to support their living. Hence, certain body movements are observed in every organism but the means vary according to their body structure. Below are list of different types of movements in animals. [Running, Jumping, Walking, Slithering, Crawling, Flying, Swimming, Creeping.]

Write the types of movements seen in these animals.

NO	ANIMALS	TYPES OF MOVEMENTS	BODY PARTS OF MOVEMENTS
1	Duck		
2	Horse		
3	Bird		
4	Snake		
5	Fish
