FINAL EXAM THIRD YEAR SOLUTIONS

SET 2

7- A) Read the text carefully.

What is a digital camera?

A digital camera or digicam is a camera that encodes digital images and videos digitally and stores them for later reproduction. Most cameras sold today are digital, and digital cameras are incorporated into many devices ranging from PDAs and mobile phones.

Digital and film cameras have an optical system, typically using a lens with a variable diaphragm to focus light onto an image device.

The first digital camera sold to consumers is supposed to be the Casio VS-101 in 1987, but a very similar camera was produced the same year by Nikon, the Nikon QV-1000C, designed as a press camera and not offered for sale to general users. Nikon sold only a few hundred units, it recorded images in greyscale, and the quality in newspaper print was equal to film cameras.

Nowadays, compact cameras are intended to be portable, easy to use and suitable for casual "snapshots". Almost all include an automatic mode which automatically makes all camera settings for the user. Most have a built-in flash usually of low power, sufficient for nearby subjects. Live preview is almost always used to frame the photo on an integrated LCD display. In addition to being able to take still photographs almost all compact cameras have the ability to record videos.

20- 7- B) Say true, false or don't know about the text.

- 1- The first digital camera was sold in 1887. _____
- 2- The first digital camera was used by a teenager. _____
- 3- Only a few digital cameras include an automatic mode. _____
- 4- Digital cameras are designed to be easy to use. _____
- 5- Videos are also recorded by digital cameras. _____

25- 7- C) Answer about the text.
