

$$V = Lwh$$

$$V = \pi r^2 h$$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

WELCOME TO MATH CLASS!  
**GEOMETRI (BANGUN RUANG)**

$$y = mx + b$$

$$a = \frac{V_f - V_i}{t}$$

$h$   
 $b$   
 $l$   
 $V = \frac{1}{2} bhl$

$$\frac{x}{a} + \frac{y}{b} = 1$$

$$ax^2 + bx + c = 0$$

 **LIVEWORKSHEETS**

$$V = \frac{4}{3} \pi r^3$$
