Choose the correct answer

_____ is the natural, dynamic, and continuous process through which the species adapt to the environment they live in.

By doing so, their _____ present _____.

This means the evolutionary process is _____.

Evolution involves the _____ of living beings through _____ so that changes are heritable.

Theories of evolution

Match the theories with the key words

- | | |
|----------------------------|--|
| 1. Lamarck's Theory | the evolution of the species by natural selection |
| 2. Darwin's Theory | inheritance of acquired characteristics |
| 3. Wallace's theory | natural selection could lead to reproductive isolation of 2 species. |
| 4. Neo-Darwinism: | combines Darwin's theory with Mendel's genetic laws and other advances in genetics. |
