LIVEWORKSHEETS

1 Read and write the letter of each experiment in the correct box.

EXPERIMENT A
Make an Egg Float!

You will need:
one egg, some water, some salt, a glass

Instructions:
1. Put some water into the glass until it is half full and stir in six tablespoons of salt.
2. Pour in some more water carefully. Don't mix this water with the salt water.
3. Put the egg carefully into the water and watch what happens.

You will see:
The egg floats in the middle of the glass, on top of the salt water.

EXPERIMENT B
Make a Gum Candy Grow!

You will need:
one gum candy, some water, a glass

Instructions:
1. Fill the glass with water.
2. Put the gum candy into the water and watch what happens.

You will see:
The gum candy gets bigger and loses some of its color.
