

The environment gives us many benefits that we can't repay our entire life. The forest and trees filter the air and absorb harmful gases. Plants purify water, reduce the chances of flood maintain natural balance and many others.

Moreover, the environment keeps a close check on the environment and its functioning, It adjusts the vital systems that are essential for the ecosystem. Besides, it maintains the culture and quality of life on earth.

The environment adjusts various natural cycles that happen daily. These cycles help in maintaining the natural balance between living things and the environment. Disturbance of these things can affect the life cycle of humans and other living beings.

The environment has helped us and other living beings to flourish and grow from thousands of years. The environment provides us fertile land, water, air, livestock and many essential things for survival.
