

Oblicz:

$$6 \cdot \frac{3}{4} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square \frac{\square}{\square}$$

$$\frac{1}{2} \cdot 3 = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \left[\frac{\square}{10} \cdot 10 \right] = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$$

$$9 \cdot \frac{2}{3} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$$

$$\frac{2}{5} \cdot 5 = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$$

$$14 \cdot 2 \frac{3}{10} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square \frac{\square}{\square}$$

$$15 \cdot 1 \frac{9}{20} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square \frac{\square}{\square}$$

$$8 \cdot 1 \frac{5}{6} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square \frac{\square}{\square}$$

$$6 \cdot 2 \frac{2}{3} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$$

$$9 \cdot 3 \frac{5}{9} = \frac{\square \cdot \boxed{32}}{\square} = \frac{\square}{\square} = \square$$
