

Unit 12 L 7-8

Listen to three possible ways of solving the problem suggested by the scientists. Are there any other advantages or disadvantages of each idea?

Drill new wells

- + New sources of water.
- Expensive process.

**Convert more sea water
into drinking water**

- + Plentiful supply of sea water.
- Expensive.

**Improve ways of
storing water**

- + No need to find new water.
- May not provide enough water for demand.
