Studying black bears

After years studying North America's black bears in the **(0)** way, wildlife biologist Luke Robertson felt no closer to understanding the creatures. He realised that he had to **(1)**..... their trust. Abandoning scientific detachment, he took the daring step of forming relationships with the animals, bringing them food to gain their acceptance.

The **(2)** this has given him into their behaviour has allowed him to dispel certain myths about bears. **(3)** to popular belief, he contends that bears do not **(4)** as much for fruit as previously supposed. He also **(5)** claims that they are ferocious. He says that people should not be **(6)** by behaviour such as swatting paws on the ground, as this is a defensive, rather than an aggressive, act.

However, Robertson is no sentimentalist. After devoting years of his life to the bears, he is under no **(7)** about their feelings for him. It is clear that their interest in him does not **(8)** beyond the food he brings.
