Encuentre el número compuesto del producto de sus factores primos.

$$2^2 \times 3^2 =$$

$$\boxed{} \times \boxed{} = \boxed{}$$

$$2^3 \times 3 \times 5 =$$

$$\begin{array}{ccccc} \boxed{} & \times & \boxed{} & \times & \boxed{} \\ & \searrow & & \swarrow & \\ & \boxed{} & \times & \boxed{} & \\ & & \searrow & \swarrow & \\ & & \boxed{} & & \end{array}$$

$$3 \times 5^2 =$$

$$\begin{array}{ccc} \boxed{} & \times & \boxed{} \\ & \searrow & \swarrow \\ & \boxed{} & \end{array}$$

$$5^2 \times 7^2 =$$

$$\begin{array}{ccc} \boxed{} & \times & \boxed{} \\ & \searrow & \swarrow \\ & \boxed{} & \end{array}$$

$$11 \times 13 =$$

$$\boxed{}$$
