

Practise

Using the information below, fill in the blanks of the flowcharts for Algorithms 9 and 10.

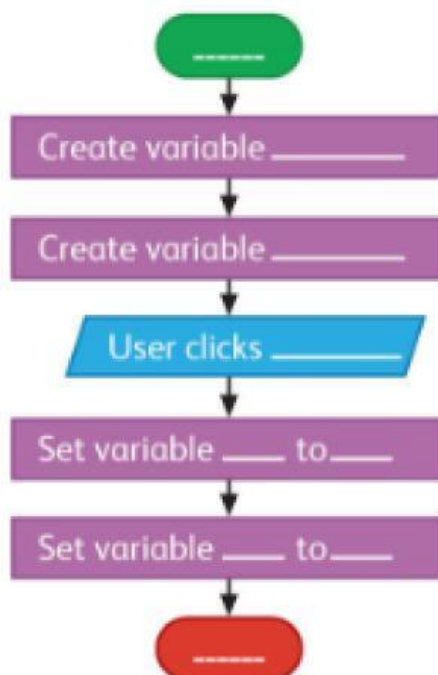

Algorithm 9

- Create two variables: Name and Age
- When user clicks the Green Flag both variables are set to the value 0.

Algorithm 10

- Program starts when user presses the down-arrow key.
- Devin introduces himself by saying, "Hello! My name is Devin" for 3 seconds. He then asks, "What is your name?"
- User will then enter their name.
- Set variable Name to the data that is entered by the user.
- Devin will greet the user by using the data stored in the variable Name. He will say "Hello" and the name of the user for 3 seconds.
- Devin then asks, "How old are you?"
- User will then enter their age.
- Set variable Age to the data that is entered by the user.
- Devin then says, "Me too!" for 2 seconds.

Algorithm 9

Algorithm 10
