QUESTION 1. READING: READ THE FOLLOWING TEXT AND CHOOSE THE CORRECT WORD FOR EACH SPACE. (Each correct answer equals 0,20)

Smiling: An International Language

Have you ever thought of the value of a smile? It is free to give and can change the mood of the person who receives it. Everyone can do it, even little babies. It connects us with other humans, no matter what language we speak. Beyond being able to make connections with other humans, do you know that establishing a habit of smiling on a regular basis also has wonderful health benefits? Studies have shown that even if you are not having a good day, smiling can boost your mood. It's because the physical act of smiling sends signals to your brain that you are actually happy. Smiling also reduces stress levels because it releases chemicals called endorphins. Smiling has other benefits too. According to psychologists, it makes us more creative and better problem solvers. Smiles also send subliminal messages to those who see us that we are confident and relaxed, which can make us more attractive to others! And smiling is contagious – when we see another person smile, we are likely to smile back. This has a domino effect and makes our world a more positive place.

Based on the reading, determine if each of the sentences are **True (T)** or **False (F)**.

1. If you and a friend speak different languages, you can still communicate through a smile. **T F**
2. If you are not having a good day, smiling does not help. **T F**
3. Your stress level increases if you smile. **T F**
4. People see us as confident if we smile. **T F**
5. If someone sees you smile, they usually smile too. **T F**
