

3 2 + 2 6 =

Kõigepealt liidan kümnelised, siis ühelised.

Saab ka teistmoodi.

3 0 + 2 0 + 2 + 6

5 0 + 8 = 5 8

3 2 + 2 0 + 6

5 2 + 6 = 5 8

Ja ka kirjalikult arvutades.

K	Ü
3	2
+	2 6
5	8

Kõigepealt liites ühelised:

2 + 6

ja seejärel kümnelised:

3 + 2

Uuri näidet ja arvuta sarnaselt.

$$53 + 44 = 50 + 40 + 3 + 4 = 90 + 7 = 97$$

$$34 + 26 = \dots + \dots + \dots + \dots = \dots + \dots = \dots$$

$$45 + 23 = \dots + \dots + \dots + \dots = \dots + \dots = \dots$$

$$16 + 62 = \dots + \dots + \dots + \dots = \dots + \dots = \dots$$

$$52 + 37 = \dots + \dots + \dots + \dots = \dots + \dots = \dots$$

Uuri näidet ja arvuta sarnaselt.

$$53 + 44 = 53 + 40 + 4 = 93 + 4 = 97$$

$$81 + 17 = \dots + \dots + \dots = \dots + \dots = \dots$$

$$35 + 42 = \dots + \dots + \dots = \dots + \dots = \dots$$

$$14 + 77 = \dots + \dots + \dots = \dots + \dots = \dots$$

$$45 + 32 = \dots + \dots + \dots = \dots + \dots = \dots$$

Arvuta kirjalikult. NB! Alusta tehte arvutamist paremalt vasakule.
