

Surface Area of 3D Shapes

Name/ Class:

Date:

Look carefully the 3D shapes below, complete the net of 3D shapes with its measurement and determine the surface area!

1.

Area A = in^2

Area B = in^2

Area C = in^2

Area D = in^2

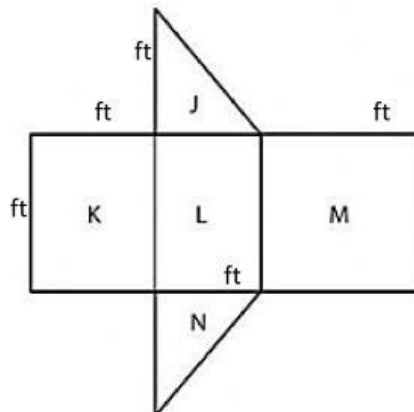

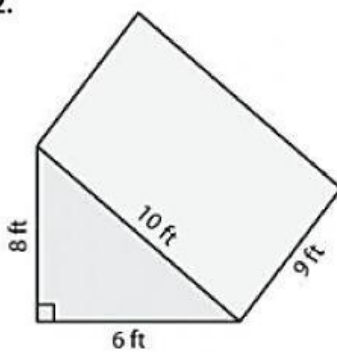

Area E = in^2

Area F = in^2

Surface Area = Area A + Area B + Area C + Area D + Area E + Area F

Surface Area = + + + + + +
= in^2

2.

Area J = ft^2

Area K = ft^2

Area L = ft^2

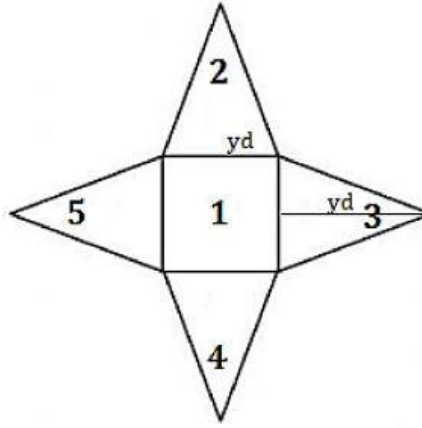

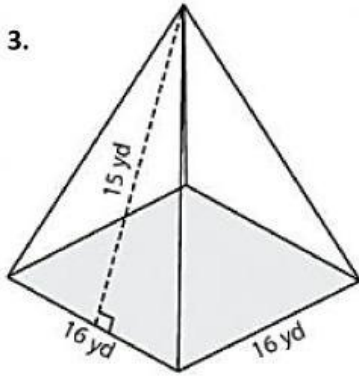

Area M = ft^2

Area N = ft^2

Surface Area = Area J + Area K + Area L + Area M + Area N

Surface Area = + + + + +
= ft^2

3.

Area 1 = yd^2

Area 2 = yd^2

Area 3 = yd^2

Area 4 = yd^2

Area 5 = yd^2

Surface Area = Area 1 + Area 2 + Area 3 + Area 4 + Area 5

Surface Area = + + + +
 = yd^2
