Tomato Soup

These are the ingredients you need:

- 2½ kg of very ripe tomatoes
- 2 medium onions
- 1 garlic clove
- 2 oz of butter or margarine
- 3 to 4 tablespoons of all-purpose flour
- 4 tablespoons of tomato paste
- 4 cups of hot water
- 1 teaspoon of sugar
- 1½ teaspoons of salt
- 1 pinch of pepper
- 4 fresh basil leaves, torn into pieces

The steps:

1. Pour some boiling water over the tomatoes. After that, pour some cold water on them. This makes them pop out of their skins easily.
 2. Skin the tomatoes, cut out the tops, discard the seeds and dice the flesh.
 3. Peel the onions and the garlic clove. Chop them finely.
 4. Heat the butter or margarine in a frying pan and saute the chopped onion and garlic.
 5. Sprinkle with flour and stir in the tomato paste. While stirring, add hot water.
 6. Remove the frying pan from the heat and stir the mixture until the soup is smooth and there are no more lumps.
 7. Boil the soup again and add the diced tomato.
 8. Cover the soup and let it simmer for about 10 minutes on low heat.
 9. Add sugar and season with salt and pepper.
 10. Pour the soup into a bowl and decorate with a few basil leaves.
9. What is the advantage of the food?...

Earthquake is one of the natural disasters which is the shaking of the earth's surface. This disaster happens in many areas of the world. This brings many victims and material damages.

There are several types of earthquakes including tectonic and volcanic earthquake. The tectonic earthquake is the common one and it happens because of the movement of the crust, meanwhile volcanic earthquake happens as the effect of volcanic activity.

Earthquake happens as the layers below the surface of earth are active. The basic layers are a solid crust, a hot, nearly solid mantle, a liquid outer core and a solid inner core. The crust and mantle form a lithosphere. It is made up of tectonic plates. The plates

are constantly moving and it makes stresses on the crust.

When the stresses are too big, it causes a fault. The movement happens on the fault as the tectonic plates are moving.
