Part 1

At Sungai Lestari.

Galang : Mom, what's the name of this river?

Posma : It's Sungai Lestari.

Pak Rahmansyah : When I was your age, I often came down to this river.

Galang : But it does not look very clean. Was the river this dirty back then? Did you swim in the river?

Pak Rahmansyah : I did! The river was quite clean back then.

Galang : Were there others that went to the the river?

Pak Rahmansyah : A lot of kids swam and played in the river.

Galang : How did it become so dirty like this? Did people throw their trash into this river?

Bu Posma : Well, that is one of the causes. People also started to use a lot of plastic. And plastic does not decay easily.

Pak Rahmansyah : Plastic trash began to litter a lot of places. It made this river dirty.

Bu Posma : The plastic trash also caused many other problems, like the flood in a nearby town a couple of days ago.

B. Read the story and answer the questions based on the text story.

A team of scientists from Texas University helped an injured sea turtle when they sailed in the ocean near Costa Rica.

The scientists were collecting data on sea turtles when they saw the injured turtle. They noticed something in the nose of the turtle when it was swimming near their boat. But, they initially thought it was only a worm.

The scientists were curious. They caught the turtle to examine the object in the turtle's nose. They wanted to make sure it was not a dangerous parasite. They extracted a couple of centimeters of the object with pliers. The object came out. It was wrinkled and brownish.

It was a plastic drinking straw!

The scientists removed the object immediately because they were far away in the ocean. They spent almost ten minutes pulling it from the nostril of a sea turtle. With great difficulty, they succeeded in pulling the straw out of the turtle's nostril. The nostril was bleeding, but the turtle was safe.

The straw incident proved how dangerous plastic was to animals in the oceans.

Unit 3

Read the story of two teenagers who fought to clean up Bali from plastic trash

Melati and Isabel Wijsen live in Bali. They spent their teenage years cleaning up the island from plastic.

Melati and Isabel were only 12 and 10 years old when they decided to tackle plastic pollution. They found plastic everywhere in their everyday lives. They saw it when they walked to the rice fields or when they went to the beaches.

They were aware of this growing problem with plastic in places it should not be. They felt the urgency to protect the environment and the natural world.

The sisters began a movement, 'an annual island clean up'. The movement was for everyone in Bali. Early on a Sunday morning they carried megaphones and stood on the back of a flatbed truck. Thousands of children and teenagers with their parents came out to help. Volunteers from local restaurants and hotels also showed up. They collected trash at 115 places around the island. They picked up plastic trash on the beaches, the rivers and the streets.

The two sisters became local heroes, and they won international acclaim for their awareness campaign.
