

Name: _____

Class: _____

19. Find the Missing Part of Multiplication

A. Visual learning

How can we find the missing factor in a multiplication?

$$5 \times \boxed{?} = 15$$

We can use the **tables of multiplications**.

B. Independent practice

1. Write the missing factors.

$$2 \times \underline{\quad} = 14$$

$$5 \times \underline{\quad} = 25$$

$$\underline{\quad} \times 17 = 17$$

$$0 \times \underline{\quad} = 0$$

$$\underline{\quad} \times 9 = 18$$

$$\underline{\quad} \times 6 = 30$$

2. Write numbers to complete the pattern.

5	10	15		25			40		50
---	----	----	--	----	--	--	----	--	----

3. Circle the correct answer.

Rita has some bags, each bag has 3 pencils.

She has 15 pencils in all.

How many bags of pencils does Rita have?

A. 12 bags

B. 3 bags

C. 5 bags

Write the missing numbers for each problem.

4. Ben has 2 bikes.

Each bike has 2 wheels.

There are _____ wheels in all.

$$\underline{\hspace{1cm}} \times \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$

5. Sue has 5 baskets.

Each basket has _____ apples.

She has 20 apples altogether.

$$\underline{\hspace{1cm}} \times \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$

6. Write the missing numbers.

$$5 \times 5 = 1 \times \underline{\hspace{1cm}}$$

$$\underline{\hspace{1cm}} \times 7 = 1 \times 14$$

$$0 \times \underline{\hspace{1cm}} = 1 \times 0$$
