Read the Below texts and answer the questions

Do you think it is good to learn foreign languages

I definitely think learning a foreign language makes you better at your own language. I didn't understand grammar until I started learning French but now I can see a connection between French and my own language and that helps me get good grades in both subjects at school.

In my opinion, learning a second language helps you to study better. Faisal, 14

I agree! My mother is a teacher at a college and she says that learning foreign languages can help keep your brain healthy and improve your memory! Of course there is a lot of new vocabulary in every language and you need a very good memory to remember it all, so I would say the more languages you know the better your memory will be! Also if you learn more languages, it gets easier to learn them. Khalfan, 13

I don't agree that it gets easier! I don't think I'm very good at learning other languages. I wish I was. I think it would be fun to make friends online and communicate with people from all over the world. I am going to try hard to learn to become fluent in at least one other language in the future, but I don't know which one I will choose.

Salama, 13

For each question, choose the correct option that corresponds to the events or reactions described in the paragraph.

Question 1:

What does Faisal believe about learning a foreign language?

- a. It makes you worse at your own language.
- b. It has no impact on your own language skills.
- c. It makes you better at your own language.
