

## Activity 7

Start to plan your RC car program. First, read the descriptions below.

Match the descriptions with the programming blocks.

| Description                                        | Programming blocks |
|----------------------------------------------------|--------------------|
| Set the pins for servomotors.                      |                    |
| Set the pin for remote control and the IR sensor.  |                    |
| Receive input using the IR sensor.                 |                    |
| Respond to user-initiated events to move forwards, |                    |
| Respond to user-initiated events to move left,     |                    |
