Tips to Separate Rubbish

There are some tips on how to separate rubbish at home. The most simple way to separate your rubbish is by categorizing them into two types. First, you can collect organic rubbish. Examples of organic rubbish are food scrap, leaves, plants and soil. They can go into the composter. They are good to use as fertilizer. Second, you should collect non-organic rubbish. The materials that belong in this category are paper, plastic, cardboard, metal and fabric. Before we throw them into the recycle bin, we should clean them. Then, they can be recycled into new products. Separating rubbish is very useful to keep our environment clean. Read the text again and have a look at the rubbish collection. Can you separate them based on the categories?
