

# What is area?

To find the area of a rectangle or a square you have to use a formula.

|   | Question                                                                                           | Answer                                                                                                                              |
|---|----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <p>Square</p>     | <p>The area of this square is</p>  $\text{cm}^2$   |
| 2 | <p>Rectangle</p>  | <p>The area of this rectangle is</p>  $\text{m}^2$ |

For square  
you multiply  
side by side.

For rectangle  
you multiply  
length by  
width.
