- 5 Raman and Sanjay are members of a quiz team which has 9 members in total. Two photographs of the quiz team are to be taken.

For the first photograph, the 9 members will stand in a line.

- (a) How many different arrangements of the 9 members are possible in which Raman will be at the centre of the line? [1]
- (b) How many different arrangements of the 9 members are possible in which Raman and Sanjay are not next to each other? [3]

For the second photograph, the members will stand in two rows, with 5 in the back row and 4 in the front row.

- (c) In how many different ways can the 9 members be divided into a group of 5 and a group of 4? [2]
- (d) For a random division into a group of 5 and a group of 4, find the probability that Raman and Sanjay are in the same group as each other. [4]

2 A group of 6 people is to be chosen from 4 men and 11 women.

compiled by
Ahmed Gul

(a) In how many different ways can a group of 6 be chosen if it must contain exactly 1 man? [2]

Two of the 11 women are sisters Jane and Kate.

(b) In how many different ways can a group of 6 be chosen if Jane and Kate cannot both be in the group? [3]

W21 P53 Q5ab

- 5 A security code consists of 2 letters followed by a 4-digit number. The letters are chosen from {A, B, C, D, E} and the digits are chosen from {1, 2, 3, 4, 5, 6, 7}. No letter or digit may appear more than once. An example of a code is BE3216.

compiled by
Ahmed Gul

- (a) How many different codes can be formed? [2]
- (b) Find the number of different codes that include the letter A or the digit 5 or both. [3]

3 (a) How many different arrangements are there of the 8 letters in the word RELEASED? [1]

(b) How many different arrangements are there of the 8 letters in the word RELEASED in which the letters LED appear together in that order? [3]

(c) An arrangement of the 8 letters in the word RELEASED is chosen at random.

Find the probability that the letters A and D are not together.

- 5 Every day Richard takes a flight between Astan and Bejin. On any day, the probability that the flight arrives early is 0.15, the probability that it arrives on time is 0.55 and the probability that it arrives late is 0.3.

compiled by
Ahmed Gul

- (a) Find the probability that on each of 3 randomly chosen days, Richard's flight does not arrive late. [1]
- (b) Find the probability that for 9 randomly chosen days, Richard's flight arrives early at least 3 times. [3]
- (c) 60 days are chosen at random.

Use an approximation to find the probability that Richard's flight arrives early at least 12 times. [5]

- 6 (a) Find the total number of different arrangements of the 8 letters in the word TOMORROW. [2]

compiled by
Ahmed Gul

- (b) Find the total number of different arrangements of the 8 letters in the word TOMORROW that have an R at the beginning and an R at the end, and in which the three Os are not all together. [3]

Four letters are selected at random from the 8 letters of the word TOMORROW.

- (c) Find the probability that the selection contains at least one O and at least one R. [5]

S21 P53

- 6 (a) How many different arrangements are there of the 11 letters in the word REQUIREMENT? [2]
- (b) How many different arrangements are there of the 11 letters in the word REQUIREMENT in which the two Rs are together and the three Es are together? [1]
- (c) How many different arrangements are there of the 11 letters in the word REQUIREMENT in which there are exactly three letters between the two Rs? [3]

compiled by
Ahmed Gul

Five of the 11 letters in the word REQUIREMENT are selected.

- (d) How many possible selections contain at least two Es and at least one R? [4]

- 6** Mr and Mrs Ahmed with their two children, and Mr and Mrs Baker with their three children, are visiting an activity centre together. They will divide into groups for some of the activities.

compiled by
Ahmed Gul

(a) In how many ways can the 9 people be divided into a group of 6 and a group of 3? [2]

5 of the 9 people are selected at random for a particular activity.

(b) Find the probability that this group of 5 people contains all 3 of the Baker children. [3]

All 9 people stand in a line.

(c) Find the number of different arrangements in which Mr Ahmed is not standing next to Mr Baker. [3]

(d) Find the number of different arrangements in which there is exactly one person between Mr Ahmed and Mr Baker. [3]
