

### Population, by Age and Sex: 1950, 1990, and 2025

(In millions)

■ Developing Countries

■ Developed Countries

1950

1. In 1950, in developed countries, which age category had the greatest number of females?

- A. 35-39
- B. 50-54
- C. 0-4
- D. 15-19

2. In 1950, in developing countries, how many males were in the 10-14 age category?

- A. less than 50 million
- B. about 75 million
- C. more than 100 million
- D. about 125 million

3. In 1990, in developed countries, which age category had the greatest number of males?

- A. 40–44
- B. 35–39
- C. 30–34
- D. 25–29

4. In 1990, in developed countries, what was the total number of males and females, age 10–14?

- A. about 80 million
- B. about 40 million
- C. about 180 million
- D. about 140 million

5. In 1990, in developing countries, which age category had the least number of females?

- A. 0–4
- B. 20–24
- C. 75–79
- D. 80+

6. In 2025, in developing countries, how many males will be 50–54?

- A. about 300 million
- B. about 200 million
- C. about 100 million
- D. about 50 million

7. In 2025, in developed countries, how many females are between 0 and 14 years old?

- A. more than 250 million
- B. about 120 million
- C. less than 80 million
- D. about 40 million

8. In 2025, in developed countries, which age group will have the greatest number of females?

- A. 60–64
- B. 70–74
- C. 75–79
- D. 80+
