Ice Breaker

How to make compost bin

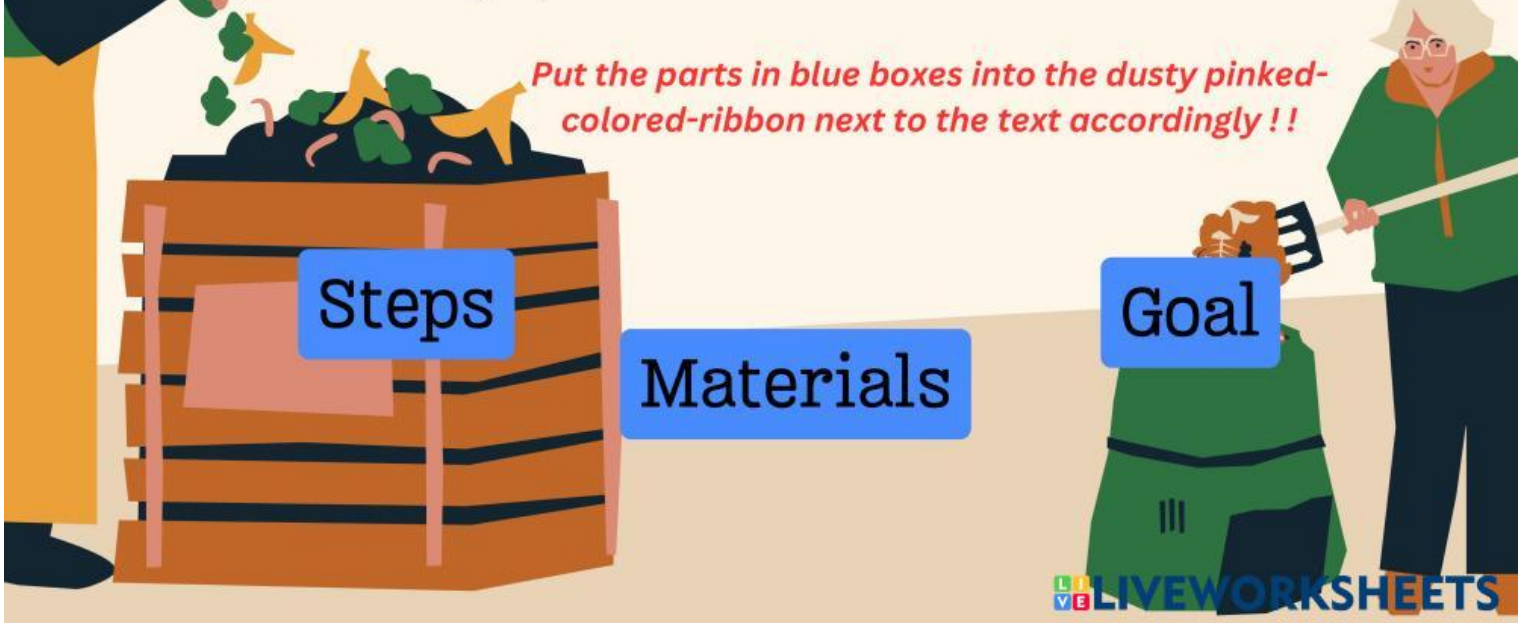

You need to prepare :

Bucket/Unused Bucket with its lid
Soldering Iron
Soil/Compost
Organic Waste/Kitchen Waste
Dry Materials
Shovel or Digging Tool

Composting for a Cleaner Tomorrow

Instructions :

1. Take the unused or old bucket with a lid.
2. Use a soldering tool to create neatly spaced holes on each side of the bucket.
3. Dig a hole in the ground approximately 30cm deep.
4. Place the bucket into the dug hole.
5. Cover the outer sides of the bucket with soil neatly.
6. Fill the bucket with several layers, including:
   Layer 1: Soil/compost
   Layer 2: Organic waste/kitchen scraps
   Layer 3: Dry waste/materials such as dry leaves, sawdust, etc.
7. Close the bucket tightly with the lid.

Put the parts in blue boxes into the dusty pinked-colored-ribbon next to the text accordingly ! !

How to make compost bin

Composting for a Cleaner Tomorrow

You need to prepare :

Bucket/Unused Bucket with its lid
Soldering Iron; Soil/Compost
Organic Waste/Kitchen Waste
Dry Materials ; Shovel or Digging Tool

Instructions :

First, take the unused or old bucket with a lid.
Second, use a soldering tool to create neatly spaced holes on each side of the bucket.
Third, dig a hole in the ground approximately 30cm deep using the shovel.
After that, place the bucket into the dug hole.
Next, cover the outer sides of the bucket with soil neatly.
Then fill the bucket with several layers, which are :

- Layer 1: Soil/compost
- Layer 2: Organic waste/kitchen scraps
- Layer 3: Dry waste/materials such as dry leaves, sawdust, etc.

Finally, close the bucket tightly with its lid.
