

**Let's create your own App!**

**Coding  
School**

By now you have completed the first 100 worksheets on dpcode.lk and 100 homework assignments for each worksheet. Through all those projects and exercises, Sprite Lab, Artist, App Lab, Game Lab and Dance Party have been studied on the code.org website.

	Sprite Lab
	Artist
	App Lab
	Game Lab
	Dance Party

In this homework assignment, let's see how to create your own app using App Lab.

For this first, study the following short course to remind the things learned about App Lab.

**Intro to App Lab - Study short courses**

Below we present 10 apps created by a group of students studying the DP Education coding course. Study each of those apps carefully and create your own app.

## 01 – Hada Gee Potha - Collection of Children's Songs

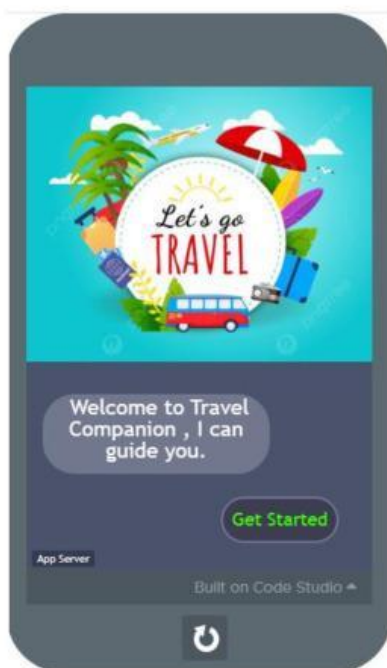

This app is designed as a collection of 50 old children's songs. Learn to listen to the lyrics of each song.

There are 52 screens and a dropdown list on the first page (in the startScreen) allows you to select songs. Over two thousand codes have been used to create the app..
