

Now that we've looked at the bodies of water that cover the Earth, let's look at the land.

Match each landform on the right with its description on the left.

Volcano •

- Land that is completely surrounded by water

Mountain •

- A place on the Earth's surface where the land is much higher

Valley •

- A flat region of lowland

Canyon •

- A lowland area between areas that are much higher with gentle slopes

Plain •

- A crack in the Earth's surface where lava can flow

Island •

- A deep cut in the Earth's surface with steep sides

Let's put all that we have learned together by filling in the blanks around this map.

Word Bank

A. Island

B. Valley

C. River

D. Glacier

E. Ocean

F. Mountain

E. Stream

F. Pond

G. Volcano

H. Plain

I. Lake

J. Canyon
