II. Read the passage and do the tasks below. (10 pts)

A 13-year-old boy has become the youngest person to climb Mt. Everest. Jordan Romero broke the previous record set by Nepal's 15-year-old Ming Kipa in 2003. Jordan has now climbed the tallest peaks on six continents. His first

record climb came when he scaled Mt. Kilimanjaro in Tanzania when he was just nine. He plans to climb the Vinson Massif in Antarctica in December. This will make him the youngest person to climb the highest mountains on all seven continents. The first thing Jordan did on the summit of Everest was call his mother. "I'm calling from the top of the world," he told her. Jordan wrote about his climbing on his blog: "It's my dream... I know it's a big goal, and lucky for me my family is supporting me every step of the way."

Jordan decided he wanted to climb the world's tallest peaks when he was in fourth grade. He told his mother and father and they started a training programme for Jordan to achieve his dream. His mother, Leigh Anne Drake, recalled the first time they took Jordan on a serious hike. She said it was a six-mile trek near their home in Big Bear, California. Drake said her son moaned, complained and cried most of the way, but when he got home, he wanted to continue training. "I decided we were going to follow Jordan's lead," Leigh Anne said. "If he wants to try it, we're going to support it." Romero said he climbed Everest for a special reason. He wanted to inspire more young people to get outdoors and reduce obesity in America's teenagers.

A. Decide whether the following statements are true (T) or false (F).

1. The boy wants to climb the highest peaks on six continents.
2. The boy's family are backing their son to reach his goal.
3. The boy decided to climb the world's highest peaks when he was four.
4. The boy wanted to give up climbing after going on a 6-mile hike.
5. The boy climbed Everest to encourage kids to lose weight.

III. Read the text and choose the best option (A, B, C or D) to complete each sentence. Write your answers in the box provided. (5 pts)

Almost all the energy on the earth comes from the sun. Heat from the sun makes the earth warm enough for life. Plants use the sun's energy to live and grow. Plants give off a gas called oxygen. Animals eat plants and breathe oxygen. Animals need plants in order to live, and plants need the sun. You use plants to create heat and energy. You can burn wood from trees. You can burn fossil fuels called coal, gas and oil. Fossil fuels formed deep underground from plants and animals that died millions of years ago.

The sun's energy can also do harm. Too much sunlight can burn your skin, causing sunburn. Harmful rays from the sun can also cause a disease called skin cancer. Looking right at the sun can harm your eyes. You need to be careful of the sun. The center of the sun is called the core, which is extremely hot. All the energy of the sun comes from the nuclear reactions in each core. It takes a long time for the energy from the core to reach the surface of the earth – about 170,000 years!

- According to the passage, the sun is vital because _____.*
 - it has its hot core
 - plants live and grow better with the sun's energy
 - plants, animals and people need energy from the sun
 - fossil fuels will be used up and people turn to the sun's energy
- Fossil fuels formed deep underground from _____.*
 - heat from the sun
 - earth and rock
 - oil and gas
 - dead plants and animals
- The title for this passage could be _____.*
 - "Energy from the Sun"
 - "Oxygen and Plants"
 - "Animals and Plants"
 - "The Sun and Fossil Fuels"
- Harmful rays from the sun may cause _____.*
 - fever
 - skin cancer
 - pain
 - headache
- All of the following statements are not true EXCEPT _____.*
 - the sun's heat does no harm to people
 - looking right at the sun is a way to make your eyes better
 - the sun is a long way from the Earth
 - the center of the sun is not very hot
