

Biome Organism Matching Game

On this worksheet are lists of biomes and pictures of many organisms, including animals, plants, fungi, and algae. Draw a line from the organism to the biome(s) in which they are found. Keep in mind that some can live in more than one biome.

In the oval, label whether each organism is an animal (A), plant (P), fungus (F), or alga (G). Some might fit into more than one category. Good luck!

To learn more about the organisms in each biome, visit the webpage [askabiologist.asu.edu/explore/biomes]

Tropical Rainforest

Temperate Forest

Desert

Tundra

Taiga

Grassland

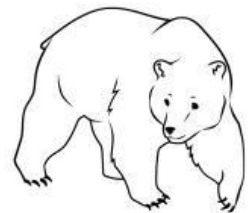

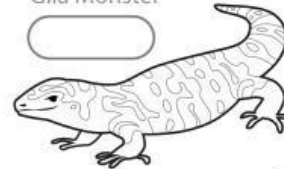

Savanna

Freshwater

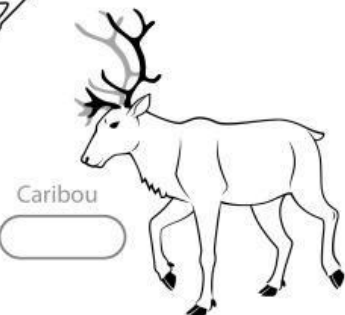

Coastal Ocean

Open Ocean

Gila Monster

Poison Dart Frog

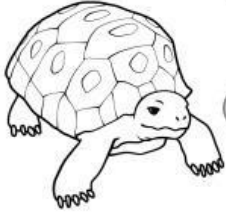

Large Patches of Grass

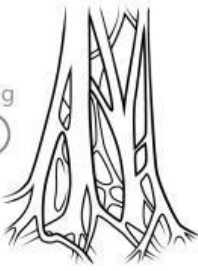

Hippopotamus

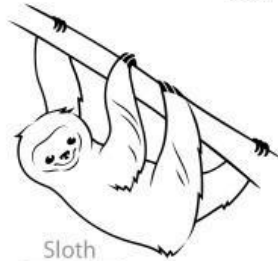

Strangler Fig

Tortoise

Lichen

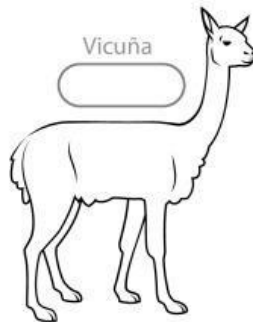

Sloth

Reeds

Plankton

Vicuña

Water Lillies

Tropical Rainforest

Desert

Tundra

Taiga

Grassland

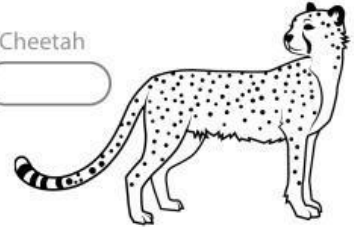

Savanna

Freshwater

Coastal Ocean

Open Ocean

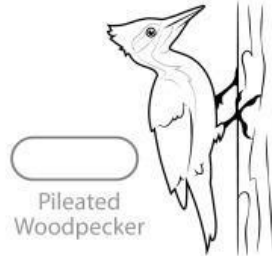

Cheetah

Acacia Trees

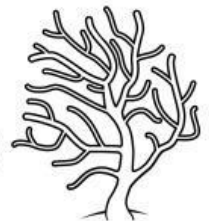

Starfish

Pileated
Woodpecker

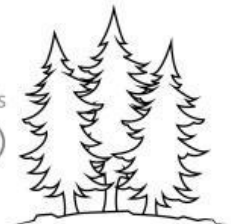

Coral

Baobab Trees

Conifer Trees

Beaver

Biome Facts Matching Game

On this page there are lists of biomes and facts. Draw a line from each fact to the biome(s) to which it applies. Keep in mind that some facts are true for more than one biome. Good luck!

To learn more about biomes, visit the webpage [askabiologist.asu.edu/explore/biomes]

Very little rainfall, dry air

Tropical Rainforest

Frequent wildfires

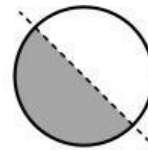

Only two seasons: wet and dry

Temperate Forest

Desert

Over half the Earth's plants & animals are found here

Very mild climate

Tundra

Taiga

The land has little or no large trees

Parts of the ground have permafrost all year long

Grassland

Savanna

Covers 45% of the Earth's surface

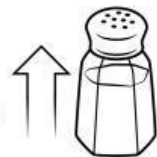

Has very long, cold winters

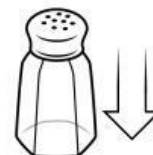

Freshwater

Water has very high salt concentration

Coastal Ocean

Open Ocean

Water has very low salt concentration

A transitional biome
