### Which invention do you think is the most useful?

The  helps us to travel quickly to distant places.

The  helps us to cook food quickly.

The  is useful on our clothes and backpacks

and  is important when we go outside on a sunny day. But I think the most important invention is the

because I love playing video games!

I like the  because it's fun to jump on! My dad says the  is important because he loves music, and my mum thinks the  is the most important invention because she can work anywhere. The  is also useful because you can change TV programmes easily. But for me, the most important invention is the  because we can use it to talk to friends, send messages and play games.
