V. Read the passage and choose A, B, C, or D to indicate the word or phrase that best fits each of the numbered blanks.**Health benefits of yoga**

The practice of yoga asanas develops (1) _____ and flexibility, while soothing your nerves and calming your mind. The asanas affect the muscles, joints and skin, and the whole body - glands, nerves, internal organs, bones, respiration and the brain. The physical building blocks of yoga are the posture and the (2) _____.

Health benefits of yoga include:

Cardiovascular system (heart and arteries) - asanas are isometric, which means they rely (3) _____ holding muscle tension for a few seconds to several minutes. This (4) _____ cardiovascular health and circulation. Studies show that regular yoga practice may help normalise blood pressure.

Digestive system - improved blood circulation and the massaging effect of surrounding muscles improves and promotes normal (5) _____.

Musculoskeletal - joints are moved through their full range of motion, which encourages mobility and eases pressure. The gentle stretching releases muscle and joint tension, and stiffness, and also (6) _____ flexibility. Maintaining many of the asanas encourages strength and endurance. Weight-bearing asanas may help prevent osteoporosis, and may also help people already diagnosed with osteoporosis (if practiced with a qualified yoga professional and guided by an allied health professional). (7) _____ benefits include reduced back pain and improved posture.

Nervous system - improved blood circulation, easing of muscle tension and the act of focusing the mind on the breath all combine to soothe the nervous system. Long-term benefits include reduced stress, (8) _____ and fatigue, better concentration and energy levels, and increased feelings of calm and wellbeing.

1. A. strong	B. stronger	C. strength	D. strengthen
