

Read the information below. Write a process text of at least 80 words about how your respiratory system works.

<i>Cause</i>	<i>Effect</i>
You breathe in.	⇒ Oxygen goes into your lungs.
Your lungs expand and shrink faster.	⇒ Oxygen goes with the blood to your muscles.
Your muscles use oxygen and create.	⇒ Carbon dioxide goes with the blood through the veins and out of the lungs.

You should use words to show cause and effect in your writing.
