

CALCULANDO UNIDADES CÚBICAS

Si la arista de cada cubo mide 1m quiere decir que cada cubo es igual a _____

Cuál es el volumen de cada figura:

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

III.- ¿Cuál es el volumen de cada cuerpo? Considera cada cubito una unidad (Ilumina)

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$

$$V = \underline{\quad} u^3$$
