renewable	release	come	heating
-----------	---------	------	---------

Fossil fuels are fuels that (17) \_\_\_\_\_ from old plants and animals. They are buried under the ground for a long time and turn into coal, oil, or gas. We use fossil fuels for many things, such as (18) \_\_\_\_\_, cooking, electricity, and transportation. Fossil fuels are very important for our life, but they also have some problems. One problem is that fossil fuels are not (19) \_\_\_\_\_. That means they will run out someday. Another problem is that fossil fuels cause pollution and global warming. When we burn fossil fuels, they (20) \_\_\_\_\_ carbon dioxide and other gases into the air. These gases make the Earth warmer and change the climate. That is why we need to find other sources of energy that are cleaner and safer.

**Read the passage about Means of Future Transport and then write True (T) or False (F) for each statement. (1 point)**

**Means of Future Transport**

Transport is the way that people and things move from one place to another. Transport can be by land, by water, or by air. In the future, transport may be very different from what we have now. Some possible means of future transport are:

- **Hyperloop:** This is a very fast train that moves in a tube which has no air. The train can go up to 1,200 kilometers per hour. Hyperloop can connect cities that are far away in a short time.

- **Flying car:** This is a car that can fly in the air. It has wings and propellers. Flying car can avoid traffic jams and save time. It can also go to places that are hard to reach by road.

- **Self-driving car:** This is a car that can drive itself. It has devices and cameras that can see the road and other cars. It can follow the traffic rules and avoid accidents. Self-driving car can make driving safer and easier.

These are some of the means of future transport that may become reality soon. They can make transport faster, safer, and more convenient. They can also help the environment by reducing pollution and saving energy.

Statements	T/F
21. Hyperloop is a very fast train that moves in a tube with no air.	
22. Flying car can go to places that are easy to reach by road.	
23. Self-driving car can follow the traffic rules and avoid accidents.
