

Doctor: What seems to be the trouble, Mr Burke?

Patient: My body aches, I have a runny nose and a bad cough. I feel terrible.

Doctor: I see. Yes, your temperature is very high, too. You have a fever. It looks like you have the flu. Do you have any allergies?

Patient: I don't think so.

Doctor: OK, great. I'm going to prescribe some medicine. Please take it twice every day. Once in the morning and once before bed. You should feel better in a few days.

Patient: Great, thank you.
