Time Allocation

Time allocation: 2 x 45 minute

Subject: Biodiversity

Learning Outcome

At the end of phase E, the students have the ability to create solutions to problems based on local, national or global issues related to understanding **the diversity of living things and their roles**, viruses and their roles, biological technological innovation, ecosystem components and interactions between components and environmental changes.

Learning Objective

Students are able to:

1. identify the advantage of species in biodiversity with understanding the concept of biodiversity;
2. create ideas for utilizing natural resources sustainably with project activities;
3. design project plan for utilizing natural resources sustainably with doing worksheets;
4. communicate the results of practical report on making product for utilizing natural resources with presentation activities and video project.

Working Instruction

1. Start by praying according to your respective beliefs
2. Read and understand the instructions for each step of the learning activity carefully
3. Read and understand relevant reading sources (Handouts, Books, etc.)
4. Do the LKPD according to the instructions. If there are difficulties in working on the LKPD, you are welcome to ask the teacher
5. Collect the LKPD according to the teacher's directions

Evaluation

After doing project planning, you have to fill this question bellow to evaluate your learning experiences activity!

1. What competency that you have been gotten after doing project activity?
2. What difficulties that you have been gotten when doing project activity?
3. What solution that you have been done to solving the difficulties during project activity?

Answer

- 1.
- 2.
- 3.
