Student Worksheet

Name: _____

Class: _____

How to Planting Flower

Tools:

1. Organic soil
2. Flower pot
3. Shovel
4. Gloves
5. Water sprinkler
6. Seedlings

Instructions:

1. Prepare flower seeds to be planted such as jasmine, roses, orchids, sun fruits, and so on.
2. prepare a place to plant, make sure the place is fertile soil and not stagnant.
3. put the seeds in a flower pot by adding fertilizer to it because otherwise the flowers will wither.
4. fill the pot with planting medium: fill the pot ¾ full with planting medium.
5. make a hole in the middle of the planting medium: make it with your finger or a small hole. the hole must be deep enough to accommodate the flower seeds.
6. plant flower seeds: insert the flower seeds into the hole and cover them with planting medium. gently compact the planting medium around the stem of the seedling.
7. water the flowers: water the flowers with enough water until the water comes out the drainage holes.
