For many years, people believed that the cleverest animals after man were chimpanzees. Now, however, there is proof that dolphins may be even cleverer than these big apes. Although a dolphin lives in the sea, it is a mammal. It is in many ways, therefore, like a human being. Dolphins have simple language. They are able to talk to one another. It may be possible for man to learn how to talk to dolphins. But this will not be easy because dolphins cannot hear the kind of sounds man can make. If the man wants to talk to dolphins, therefore, **he** will have to make a third language which both he and the dolphins can understand. Dolphins are also very friendly towards man. They often follow ships. There are many stories of dolphins guiding ships through difficult and dangerous water.
