A _____ is a boat propelled by sails.	sailboat
The left side of the hull looking forward is the _____ side.	port
The right side of the hull looking forward is the _____.	starboard
The left side of the vessel aft is the _____. (two words)	port quarter
The right side of the vessel aft is the _____. (two words)	starboard quarter
The left side of the vessel forward is the _____. (two words)	port bow
The right side of the vessel forward is the _____. (two words)	starboard bow
The left center part of the vessel is the _____. (two words)	port amidships
The right center part of the vessel is the _____. (two words)	starboard amidships
The main body of the ship is called the _____.	hull
The fore end of the ship is called the _____.	bow
The after end of the ship is called the _____.	stern
Line in the middle of the ship that divides the ship in two parts (port and starboard): _____	centerline
Line in the middle of the ship that divides the ship in two parts (forward and aft): _____	amidships
Towards the bow or front part of the hull: _____	forward
Towards the stern or back part of the hull: _____	aft
Across the vessel, from one side to the other: _____	abeam
Part of the vessel under the waterline: _____	bottom
Part of the vessel above the waterline: _____ (two words)	upper works
They divide the hull horizontally: _____	decks
Vertical steel walls that divide the hull vertically: _____	bulkheads
Space for cargo in dry-cargo ships: _____	hold
Space for cargo in liquid-cargo ships: _____	tank
Total length of the hull: _____ (three letters)	LOA
Line where the hull of a ship and water are in contact: _____	waterline
The maximum width of the hull; measured amidships: _____	beam
Distance from the waterline to the keel: _____	draft
The height of a ship from the waterline to the highest point of the ship: _____ (two words)	air draft
The height of a hull from the highest point of its main deck to the lowest point: _____	depth
The vertical distance between the waterline and the main deck: _____	freeboard
