Hi, I'm Stephen Sanders and I'm 15 years old. I go to school, do my _____ and hang out with my friends during the week. But on Saturdays, I'm in my parents' _____ building robots! I learn how to design, _____ and programme robots from _____ , and I'm also in a local robotics club. We take part in competitions together and sometimes we win prizes. Our next competition is on the _____. We've got a design for a robot guard dog and I think we can win!

I also work on my own _____ at home. I try to build useful things, like _____ that can help my parents with _____. I make a lot of _____, but I don't get upset when something goes wrong – I think it's fun to fix the _____. It's hard work and it takes a long time, but suddenly, the robot comes to life and it's all worth it!

I plan to turn my hobby into a _____ job. I want to go to university and study robotics, and then who knows? Maybe one day I can build a robot for NASA to send to another planet, or a robot doctor to work in a _____ and save lives!
