

Blood Loops

Reorder the path of the blood?

1

then, **oxygenated** blood enters the **heart** coming from the lungs. It enters through the **left atrium**.

2

The **deoxygenated** blood enters the heart through **right atrium**.

3

First, **deoxygenated** blood enters the **heart** coming from the body.

4

The **oxygenated** blood enters the **left ventricle**.

5

The right ventricle pumps the **deoxygenated** blood into **the pulmonary artery**, to go to the **lungs** (to get oxygen).

6

The **left ventricle** pumps the **oxygenated** blood into the **body** through the **aorta artery**.

7

The **deoxygenated** blood enters the **right ventricle**.
