

Sam's idea

Sam was a 5th grader who loved to come up with new **ideas**. One day, he faced a big **problem**. His room was too dark, even during the day. Sam wanted to find a **solution**.

He thought about it and decided to **invent** something that could help. He remembered learning about **electricity** in school. "Maybe I can use **electricity** to light up my room," he thought.

Sam asked his dad for some materials and got to work. He **tried** many different ways to create a light. At first, nothing worked. But Sam didn't give up. He used his **creativity** to come up with a new idea.

After a few days, Sam finally **invented** a small lamp that lit up his room perfectly. He was so proud of his **solution**. Sam learned that if you keep trying and use your **creativity**, you can solve any problem!

1. Write **true** or **false**.

- a. Sam was a 4th grader who liked to come up with new ideas.
- b. Sam's room was too bright during the day.
- c. Sam wanted to find a solution to make his room brighter.
- d. Sam thought about using water to light up his room.
- e. Sam gave up after his first attempt didn't work.
- f. Sam invented a small lamp that perfectly lit up his room.
