

Presenting My Apprentice School Program

Good morning/afternoon everyone.

It's a pleasure to be with you today.

My name's Muhammad Yusuf Sururi and I'm XI INKA Department student at SMKN 2 Jember.

And, my apprentice school program was located at PT. Inti Daya Sejati Jember.

I am so excited to report some points over the last 6 month school apprentice program.

I'm going to break down this report presentation into three parts:

First, the briefing week; second, the job sheets and finally, the journal writing report.

The first part of my presentation is the briefing week.

Before we went to the apprentice industry place, we should have joined a fully briefing program which contained soft skills and some preparation for the school apprentice program.

This first briefing program allowed students to have the knowledge of doing the rules and jobs in this apprentice workshop.

The second is the job sheets we must have done in full - 6 months school apprentice program. We must have had the experiences of the jobs relating to Electricity study and jobs. We must have attended every day workshop work like we attended the school.

Finally, we completed the school program by writing a school apprentice program by fulfilling a journal report to track the jobs experiences and having a certificate to submit to school.

That's all my presentation of my school apprentice program in PT. Inti Daya Sejati Jember.

If you have any questions, please feel free to ask me some questions after my presentation.

Thank You
