What can robots do?

Example

- Robotsaren't..... just children's toys. Robots can do many things to help us with work. People invent robots to do all kinds of boring jobs. In some factories, for example, they can put sweets carefully into boxes while in factories they make cars with no help at all!
- People also design robots help us understand as much as we can about science. Some robots left Earth and been to the moon to get rocks for us to study. They also visit other planets people can't go.
- An 'android' is a robot which looks like a person. Asimo is the name one android robot. It can't feel happy or sad, it can walk, sit down and stand up. It climbs up and down steps too. In this way, it acts like a real person. But can it think? Well, yes, but only people give it information first. It can't chat with you or your homework for you. Not at the moment. But robot designers think that one day this happen!
