

OPERACIONES COMBINADAS CON FRACCIONES

Resolver los siguientes ejercicios:

$$\frac{5}{7} + \frac{3}{7} = -$$

$$\frac{8}{12} - \frac{3}{12} = -$$

$$\frac{1}{2} + \frac{2}{4} - \frac{3}{8} = \begin{array}{r|l} 2 & 4 & 8 \\ \hline & & \end{array} \quad \times \quad \times \quad = \boxed{}$$

$$\frac{1}{2} + \frac{2}{4} - \frac{3}{8} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} - \underline{\hspace{1cm}}$$

$$= \underline{\hspace{1cm}} + \underline{\hspace{1cm}} - \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$
