

The cinematograph is a motion picture film camera which also serves as a film projector and developer. It was invented in the 1890s, but there is much **dispute as to** the identity of its inventor.

Some argue that the device was first invented and **patented** as "Cinématographe Léon Bouly" by French inventor Léon Bouly on February 12, 1892. Bouly **coined** the term "cinematograph", which translates in Greek to "writing in movement". It is said that Bouly was not able to pay the rent for his patent the following year and that the brothers: Auguste and Louis Lumière bought the license.

A more popular version of events is that Louis Lumière was the first to **conceptualize** the idea. The Lumière brothers shared the patent, and they made their first film, *Sortie de l'usine Lumière de Lyon*, in 1894.

Choose the best title for the whole passage from the list below.

- A. How the cinematograph was invented
- B. The first film projector
- C. Who invented the cinematograph?
- D. What is a cinematograph?
