

Read the text about the town of Clearwater and match the weather to the activities children do

In the town of Clearwater, the weather changes throughout the year, and the activities of the children change with it. Here's what they do when the weather changes.

Sunny Days:

When the sun is shining brightly, the kids love to play outside. They enjoy the warmth and run around in the park. The sky is completely clear with no clouds. It feels comfortably warm, so it's the perfect day for a picnic. The children play games, fly kites, and eat snacks under the strong sun.

Very Hot Weather:

During very hot weather, the temperature is really high. The kids usually go to the swimming pool to cool off. It's too hot to play outside for long, so they swim and splash around to escape the sticky heat. They also make sure to protect themselves from the sun's rays by wearing hats and sunscreen.

Comfortable Days:

On days when the weather is comfortably warm, with a gentle wind blowing, the kids love to ride their bikes and play sports. The wind makes it feel nice and cool. These days are perfect for spending time outside, and everyone enjoys the pleasant weather.

Cloudy and Rainy Days:

Sometimes, the sky is cloud-covered or partly sunny. The children might stay inside and play board games or watch movies. When there is a light drizzle, they put on their raincoats and go outside to splash in puddles. But if there is a heavy downpour or stormy weather, they stay inside where it's safe. They watch from the windows as the falling rain comes down, and sometimes they see a flash of light from the lightning.

Extremely Hot Days:

On extremely hot days, when the very hot weather becomes too much, the kids stay indoors to stay cool. The wet air makes it feel even hotter and sticky. They drink cold drinks and try to stay out of the heat. In Clearwater, the weather can be very hot or pleasantly warm, rainy or sunny, but the kids always find a way to have fun, no matter what the sky looks like.

Weather		Activity
1. The sun is shining brightly	g	a. Drink cold drinks and stay indoors
