

Read the weather forecast around the world and answer the questions

Weather Forecast

1. New York City, USA

Today, expect chilly conditions with a refreshing breeze from the northwest. Variable cloud cover will lead to occasional showers throughout the day, particularly in the late afternoon. Temperatures are anticipated to dip due to a temperature drop.

2. Tokyo, Japan

Today's weather will be characterized by mild temperatures and high humidity. Scattered thunderstorms are likely in the late afternoon, accompanied by brief, intense showers. The refreshing breeze from the southeast will provide intermittent relief.

3. Sydney, Australia

Enjoy a day of settled weather with crisp air and abundant sunshine. Temperatures will peak around 80°F (27°C). The conditions will be ideal for outdoor activities with no significant rainfall expected, though a gentle breeze may develop.

4. London, UK

The forecast includes changeable weather with thick fog in the morning, transitioning to intermittent showers as the day progresses. Temperatures will remain chilly and are unlikely to rise above 60°F (16°C). Occasional breaks in the cloud cover are possible.

5. Cape Town, South Africa

Conditions will be boiling with temperatures soaring up to 95°F (35°C). The region is experiencing a drought, and the dry conditions will persist. Sparse cloud cover may provide minimal respite from the relentless sun.

6. Mumbai, India

Expect monsoon conditions with pouring rain and high humidity. The city will be damp throughout the day, with temperatures around 85°F (29°C). Be prepared for localized flooding in low-lying areas.

7. Moscow, Russia

A blizzard is forecasted with heavy snowfall and freezing temperatures around 20°F (-6°C). Frequent hail is likely, creating hazardous conditions. The crisp air will exacerbate the cold.

8. Miami, USA

The city is under a hurricane watch due to the approach of a powerful system. Expect boiling temperatures of around 90°F (32°C), with potential for intense rainfall and flooding. Winds may reach severe levels, causing hazardous conditions.

9. Buenos Aires, Argentina

Today will feature changeable weather with periods of sunshine interspersed with damp conditions caused by light showers. Temperatures will be mild, fluctuating between 65°F (18°C) and 75°F (24°C).

10. Reykjavik, Iceland

The weather will be marked by freezing temperatures and thick fog. Expect occasional hail showers and chilly conditions throughout the day, with highs barely reaching 30°F (-1°C). Visibility may be reduced due to persistent fog.

Write where:

- it is going to be a very dry season
- people will have to wear something warm
- people are at risk of floods
- people can enjoy a day outside
- the temperatures will get lower
- the weather isn't going to be stable
